OVERVIEW

Resolving a merge conflict

Merge master into easy-mode on your computer

Paste the output of `git log -n 1` here:

```
commit
a37a4303ea438a021407695261fe338568508bf3
Merge: 32db28f 3884eab
Author: KarenWest <KarenWest15@gmail.com>
Date: Thu Jun 11 16:30:29 2015 -0400
```

 Try again!

It looks like you didn't get a merge conflict, which means you didn't merge the same sets of changes as we did. Double check which branches you merged and what state they were in. If you removed the conflict note from the commit message, that's fine, although leaving it there can help you remember when a conflict occurred.
