OVERVIEW

▤ Lesson 2   >   git diff Revisited Quiz

What two versions does
each form of git diff compare?

Choices: working directory
          staging area
          commit 1
          commit 2

git diff

git diff --staged

git diff commit1 commit2

Working directory	Staging area	Repository
file1	file1	Commit1 ...
file2	file2	Commit2 ...

working dir	staging area
staging area	commit 1
commit 1	commit 2

👍 **Correct!**

Good job!

Instructor Notes

If you are following along, you should run
`git checkout master` before you commit. This is because
your HEAD is still 'detached' from Lesson 1 when you
checked out an old commit, and running this command
will fix that. You'll learn more about what this command
does later this lesson.
